Case Study

Hager HQ - HS4 Access Control
St. Louis, MO

The Problem
100+ year old building listed with National Register of Historic Places that needed an updated security access control system.

Solution Options
Provide a access control system featuring scalable parts that integrate wirelessly into a central control system with queriable reports.

The Results
Hager powered by Salto HS4 Access Control System had the ability to provide a versatile access system with data-on-card technology and door hardware that adapted to existing door preps with minimal modification.
