FOR IMMEDIATE RELEASE:

HAGER COMPANIES ANNOUNCES ACCESS CONTROL ALLIANCE WITH SALTO SYSTEMS

Hager powered by SALTO offers keyless entry solutions

ST. LOUIS (March 30, 2017) – [Hager® Companies](#), a leading U.S. manufacturer of commercial and residential door hardware products, announces a new alliance with SALTO Systems. Hager powered by SALTO offers keyless entry solutions ranging from stand-alone, to data-on-card with online and offline access points, to real-time control and updates.

“We are thrilled to provide customers with a robust, customizable, and value-driven access control locking system,” said William Shockley, Group Vice President of Sales and Marketing for Hager Companies. “Whether you need a solution for several openings or for 65,000, Hager powered by SALTO provides our customers with a single source solution for their access control needs.”

The Hager powered by SALTO HS4 platform is a suite of modular access control products that give end users, developers, installers, distributors and architects the freedom to design systems that meet their needs. With tools such as audit trails, credential/access rights management, and opening modes, Hager powered by SALTO provides security solutions that meet the requirements of any facility.

The design of the HS4 platforms provides access control solutions that encompasses the entire building, both interior and exterior. The economic viability of the HS4 system extends these solutions to cabinets, lockers and even padlocks giving system administrators, facility managers, building owners and other end-users not only operational and security benefits, but a better user experience as well. All communications are encrypted and transmitted on closed networks. Credentials are available in many formats including key cards, key fobs, bracelets and Bluetooth enabled devices.

“The name ‘salto’ translates to ‘jump’ in English, which is very fitting for the partnership between SALTO and Hager,” said Bill Wood, President of SALTO Systems U.S.A. “Due to exceptional products and service, Hager has produced multi-generational relationships with its customers that have cultivated a strong distribution network. We’re proud to partner with Hager to bring a world class access control system that is simple to use and extremely efficient to the Contract Hardware Distributor channel.”

Due to its compatibility with other systems, the Hager powered by SALTO platform adapts easily to keep pace with evolving requirements and can accommodate a wide variety of industries, including multi-family, assisted living, education, healthcare, retail, commercial, leisure and entertainment, transportation, and government.

Hager powered by SALTO is a scalable, robust solution built on innovation and quality, delivering value to owners and property managers far beyond the initial system investment and commissioning. For additional information, visit www.hageraccesscontrol.com.

About SALTO Systems

SALTO Systems is a global leader in the development and manufacture of world-class access control solutions, particularly in sectors where security is critical – from airports and healthcare to government, education, sport and entertainment venues, hotels, and more. The company revolutionized access control with a pioneering approach that featured the first stand-alone, battery-powered electronic lock; the SALTO Virtual Network (SVN) data-on-card technology; and the first wireless access control system that combined a stand-alone locking device with online, real-time capabilities — all without using wires or mechanical keys. Its leading-edge hardware and software technologies are in use in more than 15,000 installations worldwide, with an estimated 14 million daily users. SALTO has local offices in more than 25 countries and a partner network that extends its reach to nearly every region of the globe.
