INSTALLATION INSTRUCTIONS:
1. Follow exit device installation instructions to prepare door and device for mounting.
2. Insert shims between the exit device and the door.
   1. Shims are non-handed and can be used for right-hand or left-hand applications.
   2. Rim exit device (not shown) will not require rod guide or latch shims.
3. Secure exit device with provided screws, see fastener list below for proper fastener locations.
