4500 Series Dummy Push Pad Exit Device
Installation Instructions
I-ED01291

DEVICES COVERED IN THESE INSTRUCTIONS
4500D Dummy Push Pad Exit Device

OVERVIEW

TOOLS REQUIRED

Wood Surface Mounting
For Wood doors, drill 1/8" pilot hole.

Metal Surface Mounting
For Metal doors, tap drill with a #7 bit. Tap 1/4"-20.

Through Bolting
Drill 5/16" thru from device side. Drill 3/8" from other side (pull side).

Check building and fire codes to see if your application requires the use of sleeve nuts and bolts.

Fasteners Included (shown to scale)

1. **MARK DOOR AND DRILL MOUNTING HOLES**

Mark centerline of exit device, typically 40" from finished floor. Mark and drill holes as shown below. These holes are the mounting holes for the fixed end cap bracket.

![Diagram](image1)

- For metal doors drill and tap for 1/4"-20 machine screws.
- For wood doors pre-drill 1/8" pilot holes.
- If using sex bolts, drill 5/16" clearance holes on push side of door and 3/8" holes on pull side.

2. **INSTALL DEVICE ON DOOR**

Mount the device using the two supplied screws.

![Diagram](image2)

3. **INSTALL SCREWS ON OPPOSITE SIDE**

Mark the hole locations by holding the removable end cap bracket up against the door. Make sure the exit device is level before inserting the end cap bracket lip into the exit device body. Mark and drill/tap holes. Install the end cap bracket and both end caps.
