1. Choose height at which to mount strike on frame.
2. Making sure the curved lip faces out, mark an outline of the strike and the center of the screw holes with a pen. (Use formula below to determine where the strike should be placed.)
3. Mortise this area on the frame 1/16"[3] deep, or until strike sits flush. (See frame prep picture below for more details on properly prepping the frame for a flush fit.)
5. Attach strike using (2) #6 screws.

Notes:
1. Dimension Y = 1/2(Door thickness) + 1/8"

Dimensions in [ ] are in millimeters.
