1. Determine mounting height on door (Recommend center of the plate is 45” [1143 mm] from the floor)

2. Place the plate on the door so that the edge of plate is 1.5” [38 mm] from edge of door.

3. Once plate is in the desired position on the door, mark (6) holes for drilling

4. Center punch and drill (6) 1/8” pilot holes.

5. Install the plate using (6) thread cutting screws.
