

Mobile Solutions

The SALTO JustIN Mobile app enables a user to receive their key online, anytime and anywhere.

Overview

The intuitive JustIN Mobile app communicates securely via the Cloud and enables a user to receive their key online, anytime and anywhere. Technologically cutting-edge mobile key means the end of lost key hassles, expense and waste. The technology is limitless - it can be used on main entrance doors, elevators, car park barriers, meeting rooms, etc.

It's the ideal solution for any door where you need to conveniently control access.

JustIN Bluetooth Technology Features:

Secure

- Smartphone authentication technology for verifying a mobile user's identity: PIN / Fingerprint.
- Encrypted data transfer between phone and lock means secure authentication.
- Fast and highly secure data transmission and anti-cloning technology protection.
- AES 128 bit communication
- Secure opening procedure
- Key is received securely encrypted using SSL (Secure Socket Layer).

Easy to Use

- Our intuitive app lets an end user receive their keys online, anytime and anywhere.
- Works with the guest's existing iOS and Android smartphone devices.

JustIN mSVN – Key updater

Overview

JustIN mSVN (mobile Virtual Network) is an innovative technology to update a person's access rights Over The Air (OTA) using the mSVN app for NFC-enabled phones. Direct, real-time communication between the mobile device and the user's credential increases productivity and flexibility without sacrificing security by enabling updates to happen when and where they are needed, without a user having to pass by a wired update point.

All an end-user needs is an NFC-enabled smartphone to update his DESFire EV1 credential using the JustIN mSVN app, thereby extending the reach and flexibility of an installation's security. mSVN is ideally suited for healthcare, infrastructure and other industries where mobile workers are an important part of the workforce and returning to the office to update access rights is not a viable option. By allowing users to update their access credentials remotely, JustIN mSVN increases flexibility and usability without compromising security.
