First Heartland Capital
Lake Saint Louis, MO

This two-story, brick veneer, stone, and steel frame building with over 30,000 square feet is elegant both inside and out. Clean lines and vibrant artwork provide an open and warm work environment. Designing a flexible and scalable electronic access control system with specific end user needs in mind, the Hager powered by Salto HS4 solution provides security where and when it’s needed. Easy navigation, multi-station functionality, and seamless integration allows access rights and user profiles to be quickly and easily updated with data-on-card technology.
