Community Education Building

Wilmington, DE

Formerly the Bracebridge IV building, this historic building was donated to the Longwood Foundation by the Bank of America. The CEB, an independent entity of the Longwood Foundation, created a charter public school system for grades K-12 with an emphasis on high performance.

Recognizing the demanding environment, Hager specified and supplied Grade 1 3800 Series Mortise Locks, 5200 Series and 7000 Overhead Control Door Controls, and 4500 Series Exit Devices. Also supplied were trim, auxiliary, threshold and weatherstripping products.
