Balancing Security, Convenience, and Budget

The HS4 system delivers customizable levels of control to each opening. An array of tools can be integrated in to not only interior and exterior doors, but cabinets, padlocks, lockers, mobile applications, remote applications, and much more. **Perfect for multi-family, assisted living, education, healthcare, hospitality, office, commercial, and government facilities.**

System Overview

Designing a flexible and scalable electronic access control system with specific end user needs in mind while providing security where and when it's needed.
