

8300 SERIES POWER OPERATOR & TOUCHLESS ACTUATORS

PROVIDE A BETTER SOLUTION.

If the pandemic taught us anything, it was how easy germs, bacteria, and viruses can be transmitted. As we continue to transition out of the pandemic, many of our recently adopted behaviors and preferences will not change. Simply put, people do not like touching door pulls and levers on public openings. Hager's touchless promotion creates a solution while also complying with ADA requirements.
