KS Cloud-Based Solution — A Smarter Way To Control Your Business Access.

Its proven reliability and recognized stability brings cloud access control to every business, providing vastly better functionality and performance than is possible in a traditional mechanical solution with a flexible management system that requires no software installation nor the cost of a fully-wired electronic product — all you need is an online device with an Internet connection. *KS is perfect for real estate, rental and leasing, shared spaces, and retail and chain stores.*

System Benefits

We look out for our customer's interests and well-being, which is why we provide solutions that meet their needs and make things easy.

MAINTENANCE

Cloud access control doesn't need any effort on a customer's part to maintain or manage. It is always up-to-date with the latest features via instant updates and add-ons.

FLEXIBILITY

With infinite scaling, there's no need to worry about the users or doors running out of capacity.

RELIABILITY

Ensures real-time monitoring and immediate resolution of any issues.

ANYWHERE

Manage cloud-based access control from anywhere on-the-go with an online device with an Internet connection.

MULTI-PLATFORM

Manage cloud-based access control from any device with an Internet connection – phone, tablet, or PC.

LOW OPERATIONAL COST

There's no need to purchase software licenses or install server racks to run the access control program, either for maintenance or back-ups. Reduced TCO or social costs also reduced.

BETTER USER EXPERIENCE

Updated GUI in line with today´s upgrades in tech communities and media.

STOP REPLACING LOCKS

With KS, there's no need to replace a lock if keys are lost or stolen. Simply block the tags and assign new ones instantly. Secure your business and forget about unwanted intrusions.

ONE TAG WITH UNLIMITED KEYS

Heavy keychains are now a thing of the past. Say goodbye to mechanical keys and collect all your access rights on a single tag, which can be added as a guest to multiple systems.

CONTROL WHO GOES WHERE AND WHEN

Saltoks.com allows you to individually define who can enter which doors during which time periods.

OPEN DOORS REMOTELY

With KS' one-time password technology, users can open doors remotely without a key.

GAIN ACTIVITY INSIGHTS

Receive notifications regarding door and user activity.
